

NATIONAL GEOGRAPHIC BAG \$15

This bag is a sling-type bag and has a unique design which rotates front to back for easy access to camera equipment. In other words, it can be worn in front of your body or on the back (like a backpack).

I recommend carrying the bag in front of your body for quicker access to your camera. However, if you plan on hiking for awhile and accessing your equipment at a later destination, I recommend orienting (or rotating) the bag to your back. The strap is adjustable for a custom fit, and that is nice.

The cross-body strap is padded and is fairly comfortable.

The capacity of the bag is great! There was plenty of room for my camera, extra lenses, cleaning clothes, instruction manuals. The interior has strong Velcro and the inner cushions will keep your equipment secure.

The bag is well-constructed and thickly padded. It is a bag packed with many features including: memory card pouch, glasses holder, rain-proof bag to cover the entire bag (to protect your gear), a bonus micro fibre cloth, and tripod straps.

CANON LOWEPRO CAMERA BAG \$25
